Print wristbands and labels on demand from the same printer almost anywhere – that’s smart!

Introducing the TrustSense™ Patient ID Printing Solution

Designed with both IT and Nursing in mind, it’s the smart and cost-effective way to be more productive, while ensuring best practices for patient safety.

From the leaders in mobile printing and healthcare identification.

Secure Identity and Situation Management Solutions
The model TD-2130NHC healthcare thermal printer by Brother uses TrustSense™ smart technology to help protect patients, while providing peace of mind and efficiency to caregivers. Unlike standard thermal printers, it provides complete portability to follow the needs of your patients and applications—not a power outlet. Put it to work in virtually any area of your hospital.

- Why invest resources on thermal printers that can only print one form of media?
- TrustSense™ smart technology allows users to easily load and print both wristbands and labels without special set up, providing maximum flexibility and value.
- Once loaded, the printer calibrates itself with no intervention to verify media size and set the proper print density for each type of media. This takes the guesswork out of printing.
- For superior quality and performance, the printer only uses TrustSense™ media from PDC Healthcare—a trusted leader in positive patient identification for more than 55 years.

Distractions, interruptions, and increase of workload are among the more common factors linked to identification and medical errors. The TrustSense™ patient ID printing solution helps healthcare organizations address these challenges to improve patient outcomes and enhance clinical efficiency.

- Printer’s transportable, wireless format empowers clinicians to administer care directly where it’s needed most—with the patient at almost any point of care location (from a workstation in Admissions to a cart at patient bedside, and everywhere in between).
- With optional WLAN interface and optional Li-ion battery power, it provides a level of mobility that traditional thermal printers can’t offer.
- To improve patient safety, the printer’s Bar Code Point of Care (BPOC) technology allows for real-time verification of patient identification, medication, dose, time and route. This automated process alerts caregivers to potential harmful errors before they occur, helping to protect patients, provide peace of mind for clinicians, and maintain compliance with important patient safety regulations.
Prints Both Wristbands and Labels
Easy to read, face-up printing. Quickly print accurate bar codes and text at 300 dpi at up to 6 inches per second. Superior reliability, accuracy, and speed help reduce downtime and increase workflow efficiency.
Comes with easy to use Windows software application to design, customize, and print wristbands and labels.

Intuitive Control Panel
Simple to use with easy to understand tri-color LED alerts

Optional Large LCD Display
Easy to see with fully adjustable viewing angle.

Latch Release Points
Conveniently located on both sides of printer.

Attractive Industrial Design

Optional long-life rechargeable Li-ion battery
For complete mobility, printer can be powered with Li-ion battery.
AC power comes standard.

TrustSense™ Media

by PDC Healthcare

Superior Selection, Quality, and Durability

• Choose from a wide selection of wristband and label sizes.
• Benefit from consistently accurate scan rates for positive patient ID.
• Designed to meet specific environmental requirements (NICU, laboratory, long-term care, etc.)
• Durable to stand up to the test of time and maintain effectiveness for longer than the average patient stay.

Wristbands Help Protect Patient & Their Data

• Smooth, soft materials with contoured edges are safe to the most delicate skin.
• To help protect patient data, wristbands are resistant to common fluids, including 70% Isopropyl alcohol, alkaline detergent, and hand lotion.
• Multiple closure options and tamper-evident material prevent transfer of wristbands.
• Antimicrobial coating protects wristbands from bacteria, preventing degradation and discoloration.

Distractions, interruptions, and increase of workload are among the more common factors linked to identification and medical errors. The TrustSense™ patient ID printing solution helps healthcare organizations address these challenges to improve patient outcomes and enhance clinical efficiency.

- Printer's transportable, wireless format empowers clinicians to administer care directly where it's needed most—with the patient at almost any point of care location (from a workstation in Admissions to a cart at patient bedside, and everywhere in between).
- With optional WLAN interface and optional Li-ion battery power, it provides a level of mobility that traditional thermal printers can't offer.
- To improve patient safety, the printer's Bar Code Point of Care (BPOC) technology allows for real-time verification of patient identification, medication, dose, time and route. This automated process alerts caregivers to potential harmful errors before they occur, helping to protect patients, provide peace of mind for clinicians, and maintain compliance with important patient safety regulations.

**Optional LCD Display and Touch Panel with Programmable Keys**

- **LCD Display**
  - Easy to read large backlit display

- **Programmable Touch Panel**
  - Touch Panel Keys can be easily programmed to automate multiple tasks.
  - Use the built-in real time clock/calendar to automatically print the draw time for collection of blood and specimens; designate wristband and label printing applications; search and print from downloaded databases; organize assignments of clinicians, and more!
  - Programming function enables users to easily record and reproduce patient data for re-banding. Perfect for printing during downtimes.

**Maintain Compliance with Important Industry Regulations**

The TrustSense™ Patient ID Printing Solution helps caregivers identify the correct patient and match them to the right medication, specimen, or procedure. This measure of patient safety helps organizations to maintain compliance with important patient safety regulations, including:

- The Joint Commission Patient Safety Guidelines
- HIPAA requirements for protection of patient privacy
- AHA guidelines to reduce the risk of lost or transferred data
- Centers for Medicare & Medicaid Services (CMS) Stage 2 requirements for Electronic Tracking of Medication by 2014

WLAN or Bluetooth® Wireless Accessory Option
USB, Serial, and Ethernet interfaces come standard. Optional Bluetooth® and Wi-Fi® interfaces are available for total mobility.

Long Life Li-ion Battery Pack
Recharge optional battery in the printer or with a 4-Bay charger optional accessory.

Secure Mounting Slots
underneath printer

Smart Media Sensor
TrustSense™ smart technology senses the right media and automatically calibrates itself with no intervention to verify media size and set the proper print density for each type of media.

Large Media Capacity
Accommodates over four times more wristbands or labels than a mobile printer. Works with roll media up to 5 inches in diameter.

One-Touch Adjustment for Wristbands and Labels
Allows quick and easy transition to other media.

Innovative Spindle-less Design
Simply drop in the roll and you’re ready. Saves time loading media, while removing the guess work from printing.
