

Laboratory Labels

Positive Patient Identification Solutions

When it comes to patient safety and efficient lab operations, positive ID is mission critical. But identification affects more than safety and efficiency — it impacts every aspect of the clinical environment. Higgins offers Labeling Systems designed specifically for LIS systems including: Sunquest, Cerner, SoftLab, MEDITECH, and others.

Increase patient safety and assure accuracy of identification at the point-of-care. Whether it's medication administration or specimen collection, Higgins labels help hospitals utilize the latest bar code scanning and wireless mobility products for medical care. Labeling at the point of collection provides an immediate method of positive identification, increases accuracy of labeling specimens and containers, and can help reduce costs associated with retesting. When accuracy and speed of diagnosis matter, you can count on Higgins point-of-care labeling solutions.

We offer the largest selection of laboratory labels:
